Smart Contracts

Smart contracts are computer programs or protocols for automated transactions that are stored on a blockchain and run in response to meeting certain conditions. In other words, smart contracts automate the execution of agreements so that all participants can ascertain the outcome as soon as possible without the involvement of an intermediary or time delay.

Blockchain

A blockchain is a distributed database that is shared among the nodes of a computer network. As a database, a blockchain stores information electronically in digital format.

Blockchains are best known for their crucial role in cryptocurrency systems, such as Bitcoin, for maintaining a secure and decentralized record of transactions. The innovation with a blockchain is that it guarantees the fidelity and security of a record of data and generates trust without the need for a trusted third party.

DeFi

Decentralized Finance

Next Big Revolution in Crypto World.

Decentralized Finance (DeFi) is fast disrupting the traditional financial sector.

It's called DeFi, short for decentralized finance—it's the notion that crypto entrepreneurs can recreate traditional financial instruments in a decentralized architecture, outside of companies' and governments' control.

DeFi Banking

Modern Banking Systems, despite their adoption and transition to the digital, are still a time-consuming affair. Corporate banks and other financial institutes, still control much of our private finances and have been known to prioritise their own interests over the clients. Most developing nations, further, lack the necessary infrastructure to be able to provide efficient and quick financial services.

Our crypto-based financial platform on the Metaverse, endeavours to remedy this situation, by eliminating all middlemen from the equation. This virtual space, as part of our Web 3.0 plans, is more than just a bank. It promises to be a cross-platform mixed reality metaverse district, which would comprise of multiple layers of society such as a virtual bank, healthcare system, gaming, casinos, a virtual NFT marketplace, art and entertainment to name a few.

ABOUT BINANCE SMART CHAIN

Binance Smart Chain (BSC) is a high-end blockchain infrastructure created by Binance one of the world leaders in providing blockchain solutions. Binance Smart Chain was designed to fulfill the same purposes as Ethereum - the ability to launch tokens, smart contracts and decentralized applications but with a much better efficiency. While the Ethereum network uses a token format called ERC-20, the Binance blockchain has its original, innovative token format: BEP-20. Tokens utilizing the BEP-20 format can be purchased, sold and transferred with the fees that can be 30-100x lower compared to Ethereum fees. Not only the fees, but also the transaction times of Tron Smart Chain are much lower than Ethereum's.

BINANCE SMART CHAIN

Overall, Binance Smart Chain is simply a much more effective solution than ETH. Since Ewallet Coin is an ecologically-oriented project, choosing the more energy- efficient solution was the obvious choice to make.

What Are Dapps ?

Decentralized applications (dApps) are digital applications or programs that exist and run on a blockchain or peer-to-peer (P2P) network of computers instead of a single computer. DApps (also called "dapps") are outside the purview and control of a single authority. DApps—which are often built on the Ethereum platform—can be developed for a variety of purposes including gaming, finance, and social media.

How dAPPS Work ?

In the context of cryptocurrencies, dApps run on a blockchain network in a public, opensource, decentralized environment and are free from control and interference by any single authority. For example, a developer can create a Twitter-like dApp and put it on a blockchain where any user can publish messages. Once posted, no one—including the app creators—can delete the messages.

DECENTRALIZED CRYPTO WALLET

Cryptocurrency wallets are the same as your regular wallets. The only difference is that they are used for storing digital currency. From a technical perspective, crypto wallets are basically application software intended for storing and retrieving your crypto assets.

A cryptocurrency wallet is a software program, which stores the public and private keys of an individual. The wallets also help users in interfacing with different blockchains for monitoring their assets and trading with them. Public and private keys serve as the foundation of crypto wallets.

Centralized Vs Decentralized

CENTRALIZED

By Person (MD or CMD)

Yes, mostly in case

Complete Website based

Possible by MD / admin

WZT TOKENOMICS

Token Details

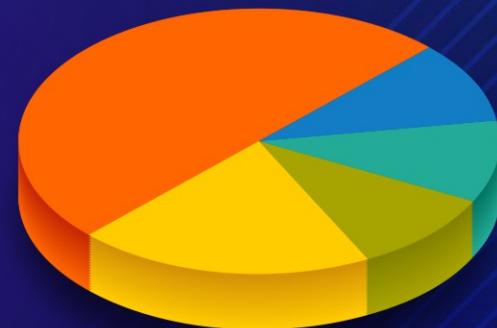

This section provides basic information about the distribution and planning of tokens

Token Name	Wallet zillia token
Token Symbol	WZT
Token Supply	5 Million WZT
Blockchain Technology	Binance Smart Chain (BEP-20)

Token Distribution

We are mined 5 Million WZT TOKEN and it will be distributed in WZT Token holder during various systems

- **AIR DROP 10%**
- **CREATOR 10%**
- **MARKETING 10%**
- **LIQUIDITY 20%**
- **STAKING 50%**

► WTZ STAKING will be live on
20th April 2023

DISCLAIMER

WARNING THIS IS COMMUNITY OF MUTUAL FINANCIAL HELP! Participant only with spare money. Don't contribute all the money you have Whatever Help, Charity, Gift, Tohafa you are going to give its up to you, you have to take your decisions with your due diligence mind, Do not contribute all the money you have, Its an global Mutual Help Community.

STAKING DETAILS

MINIMUM
50
BUSD

MAXIMUM
10000
BUSD

Cycle Period
7 Days

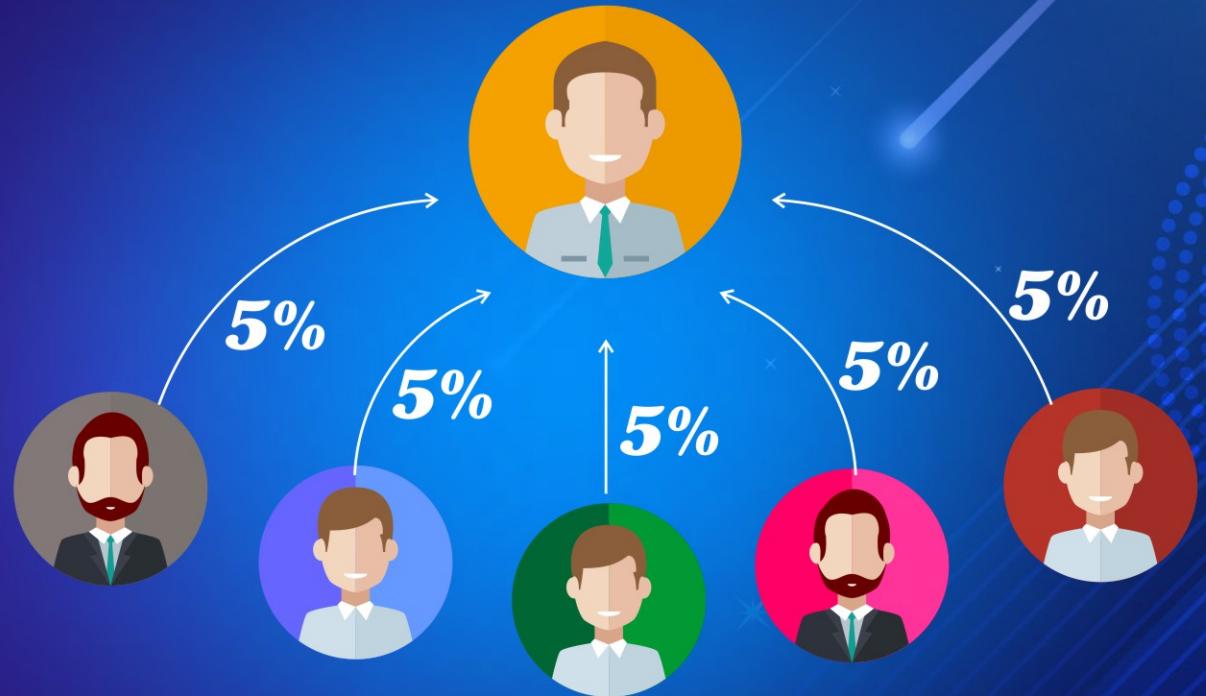

10%

Profit Every Cycle
till 300%

REFERRAL INCOME

***You can refer & Earn 5%
on every Direct Refer***

LEVEL INCOME

One direct is necessary for every level
that means 10 direct for all levels

LUCKY REWARD

Daily Top 5 Highest
Amount Investor

Of company deposited amount
equally divide in top 5 investor

Royalty Bonus

MANAGER ROYALTY

- 1 5 Directs**
- 2 15000 BUSD (50 Team)**
- 3 1000 self**

1% company turnover equally divided to all royalty manager club members till 4 month

SENIOR MANAGER ROYALTY

- 1 10 Directs**
- 2 40000 BUSD (120 Team)**
- 3 2000 self**

1% company turnover equally divided senior royalty manager club members till 9 month

AIRDROP

Wallet zillia token
Total supply - 50 lakh
Symbol (wzt)

AIRDROP
3/1

**Example : If you invest 1500 BUSD,
you will get 500 WZT Tokens
of Airdrop**

TERMS & CONDITIONS

Rule 1

5% tax of every deposit for Admin & marketing

Rule 2

5% tax of every withdrawal for token pool liquidity

Rule 3

After you get 300% income including all types of income , then you will have to invest again.

Thank You!
